Explanations	

The production at our Erzin Natural Gas Combined Cycle Power Plant, with an installed capacity of 904 MWe, is currently being carried out with one steam turbine and one gas turbine due to technical reasons.

The necessary actions have been immediately initiated to eliminate the causes of this situation. Following the completion of the remedial works, it is expected that our power plant to continue production at full capacity as soon as possible.

This statement has been prepared both in English and Turkish. In case of a discrepancy between the Turkish and the English versions of this disclosure statement, the Turkish version shall prevail.

Kind regards,

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
