

AKENERJI INFORMATION SECURITY POLICY

As one of the largest power generation companies in Turkish Energy Sector, Akenerji,
to manage any risk and opportunity for our business continuity and information assets;
We are committed;

STANDARD COMPLIANCE

To establish and implement an Information Security Management System which provides
confidentiality, integrity and availability of our assets according to ISO / IEC 27001 standard

LEGAL COMPLIANCE

To comply with all legislation related to information security and contractual obligations

RISK AND OPPORTUNITY ASSESSMENT

To manage risks of information assets by assessing according to confidentiality, integrity,
availability and determine opportunities

AWARENESS

Performing trainings, in order to increase the awareness of information security,

SUBCONTRACTORS AND SUPPLIERS

Provide appropriate awareness training about organizational policies and procedures related to
their business functions,
deciding with the supplier the information security requirements to reduce the risks
about the supplier's access to assets of company

CONTINUOUS IMPROVEMENT

Creating a continuously improving and developing structure that does not allow the emergence of
new risks and managing information security's risks and opportunities in an integrated way with
other management systems in accordance with company targets.
